Germán Suárez Rodríguez

Las Palmas, Spain • linkedin.com/in/german-suarez-rodriguez • +34 697 35 49 19 • gersuarod@gmail.com

Principal Software Engineer with over 15 years of experience. Led development at Insendi, managing over 10 engineers across two teams and cutting development cycle time by 50% and improving average API response time by 35%. Prioritized simplicity, controlled technical debt and built a team culture that kept employee turnover close to zero.

PROFESSIONAL EXPERIENCE

Insendi (EdTech startup → scaleup) — **Remote (Spain / UK)**
Senior → Principal Software Engineer — *May 2019 - Present*

- Helped transform a startup into a mature scaleup by introducing agile methodologies and a fully remote culture, and by evolving its main product through roadmap decisions, including the implementation of new AI-driven features such as quiz content generation.
- Scaled the platform to handle thousands of students concurrently through microservices, caching and asynchronous event-driven communication.
- Led the creation of a new product, making product decisions from a technical perspective and defining its roadmap in collaboration with management, product and design. Released the MVP in six months.
- Introduced development practices such as feature flags, trunk-based development and a monorepo architecture, and led major refactoring and migration initiatives.
- Improved CI/CD, halving deployment times and reducing errors, with zero unplanned downtime for three years.
- Acted as an engineering manager, mentoring several junior engineers who advanced to senior and team lead positions. Rated the company's top leader in 360° surveys, scoring above 4.8/5 with 100% participation.
- Created an employee handbook that reduced onboarding time and was rated 4.9/5 by employees.

Skills: AWS, Node.js, React, TypeScript, JavaScript, PostgreSQL, Redis, Docker, Terraform, ActiveMQ, Storybook, Datadog, Jest, React Testing Library, Playwright

Contactel Teleservicios (Regional emergency management company) — **Las Palmas, Spain**
Intern → Senior Software Engineer — *April 2011 - May 2019*

- Gradually took on responsibilities, including requirements gathering, analysis and team-based project development.
- Later led two development teams, implementing agile methodologies and consistently delivering projects on time to a high standard.
- Built and scaled the emergency management platform behind the Canary Islands' 112 service, covering a population of over 2 million.

Skills: Java, Tomcat, AngularJS, GraphQL, HTML, CSS, Oracle, PrimeFaces

EDUCATION

University of Las Palmas de Gran Canaria — **Las Palmas, Spain**
